A RESEARCH BIBLIOGRAPHY OF POLICY ON QUALITY OF HUMAN POPULATION:

Ethnic, Intellectual, Racial Restrictions, Marriage Laws  
Including Medical and Health Requirements, Laws on Steri-  
lization, and Education as They Relate to General Charac-  
teristics of the Population.

by

Prakash C. Sharma, Ph.D.  
Department of Sociology  
Florence State University  
Florence, Alabama

PREFACE

The present bibliography contains nearly 150 selected references on Policy on Quality of Human Population published chiefly during 1940-1973, including many from the following areas: (1) policy on quality in general, (2) intelligence, (3) ethnic and racial restrictions, (4) marriage laws including medical and health requirements, (5) laws on sterilization, (6) educational aspects, and (7) differential fertility and population quality. The references listed in the bibliography are by no means definitive nor are they meant to be, but they represent many of the old and current publications which may be used as guides for further research.

The bibliography is divided into two parts: Part One contains the listing of books and monographs in that area and Part Two is a listing of articles appearing in the related periodicals. The listings are arranged by the author in alphabetical order.

I would especially like to thank Mrs. Hershel Marks for typing the bibliography and Mrs. Mary Vance, Editor, Council of Planning Librarians, for her encouragement, editorial assistance and partial financial support for the work. The sole responsibility for any errors and/or omissions is mine.

It is my hope that those engaged in various aspects of population policy will find this bibliography a useful and informative instrument.

PART ONE: LISTING OF BOOKS

- Berg, Alan. Nutrition, Development and Population Growth. The Population Bulletin 29:1. Washington, D.C.: Population Reference Bureau, 1973.
- Bernert, Eleanor H. America's Children. New York: John Wiley and Sons, 1958.
- Boas, Franz. Race, Language and Culture. New York, 1940.
